Title: Factors affecting the performance of maternal health care providers in Armenia

Authors:

Alfredo L Fort (afort@intrahealth.org)
Lauren Voltero (lvoltero@intrahealth.org)

Version: 4 **Date:** 10 Mar 2004

The paper was revised based on the comments of the two peer reviewers (in particular of Dr. Koenig's), chiefly on the study design, the role of simulated observations (included in the analysis and in discussion/conclusions), additional literature review and discussion of the role of the enabling environment and program efforts to worker performance, and elaborating on the limitations of the study.
